

NIGHT SKY Math

Ana wants to count what she sees in the night sky. She looks in the sky two nights in a row. Add what she saw on each night to see how many of each thing she saw in total.

	NIGHT ONE	NIGHT TWO	TOTAL
 STARS	31	10	<input type="text"/> 41 <input type="text"/> 42
 METEORS	10	14	<input type="text"/> 21 <input type="text"/> 24
 SATELLITES	25	10	<input type="text"/> 37 <input type="text"/> 35
