

Learn about the Sun

The Sun is a huge star at the center of our Solar System. The Sun has a very strong field of gravity, that's why all the planets in the Solar System orbit around it. The Sun is made up of superheated gases. Its temperature is around 27 million °F. The Sun provides us with light and heat. The Sun is many millions of miles away from the Earth. It takes 8 minutes for its light to reach us! Because of the important role the Sun plays in our life many ancient people worshipped the Sun as a god.

Trace the dotted lines to the correct facts about the Sun.

It takes the Sun's light eight minutes to travel to the Earth.

Its temperature is around 10,000 degrees Fahrenheit.

The Sun is a huge planet.

The Sun is a huge star.

The Sun is made up of boiling water.

The Earth orbits the Sun.

Many ancient cultures thought the Sun was a god.

The Sun orbits the Earth.

It is found at the center of the Solar System.
