

Fish

Read the text and the questions. Then check the correct answers.

Fish live in streams, ponds, rivers, and oceans. Fish like to swim together with other fish in a **school**. Schools of fish swim together to stay safe.

Fish also stay safe by using **camouflage**. Some fish use camouflage by hiding in plants and rocks that are the same color as them. When bigger fish swim by, the camouflaged fish look like part of the plants or rocks and don't get eaten.

1. What does camouflage mean?

Swimming quickly

☐

Looking the same as what is around you

☐

Playing a game

☐

2. What is a school of fish?

Where they go to learn

☐

A sports team

☐

A group

☐
