

# Learning More About Dogs

Read the text and the questions.  
Then circle the correct answers.

Dogs are mammals which means they have fur and have their babies without laying an egg.

Some dogs are better as indoor pets and some are better as working dogs. Jobs that dogs can have include police work, rescue work, and working as seeing-eye dogs for the blind.

Dogs have whiskers that help them find their way at night by feeling for things around them.

Dogs have a very strong sense of smell. They can smell a lot better than humans can.
