

Identifying a Problem

Juan planted his vegetable garden two weeks ago. His plants are not growing well. He notices that after each rain, the roots of the plants are uncovered and some of the soil is gone. What is a possible problem with Juan's garden? Check off the correct answer.

- 1** The garden is not getting enough water.
- 2** The garden is on a hill and the rain washes away the soil.
- 3** The garden is not getting enough sunlight.
