

Read the passage. Check the **effect** that goes with the **cause**.

**S**tephanie and her friends play at the park every day after school. Recently they have noticed that the park is littered with plastic water bottles and other trash. They decided to take action and help their community. They have decided to go to the park and collect as much trash as they can.

They have also created posters to put up around the park reminding people to put their trash in recycling and trash bins.

## Cause:

The park was full of trash.

## Effect:

the children go to play

the children take action and collect trash
