

Plant Care

Read the text.
Check the main idea.

When you plant a seed into soil there are a few things that it will need to grow. First, you will need to be sure that your soil stays moist. You should water your seed right after you plant it, and water it each day. If it is very hot, you may even need to water it twice a day. Your plant will also need sunlight. If your plant is in a pot, place the plant in a spot where it will get plenty of sun. If you are planting seeds in a garden, make sure the garden is in a place where it will get sunlight throughout the day.

Plants need soil, sun and water.

Planting a garden can be fun.

Worksheet Answer Key.

Scan the QR code to get the answer key for this worksheet. In it, you'll also find an explanation of how to solve the worksheet and additional learning resources.

Complete this worksheet online.
