

# Latitude and Longitude:

## MAP LOCATIONS

You can use lines of **latitude** and **longitude** to find places on a map. Look at the map and answer the questions below.

1. Which continent can be located at  $90^{\circ}\text{N}$  and  $60^{\circ}\text{W}$ ?

North America

South America

2. Point C is in South America. Where can it be located on the map?

$60^{\circ}\text{S}$   
and  
 $30^{\circ}\text{W}$

$120^{\circ}\text{S}$   
and  
 $90^{\circ}\text{W}$

3. Point B is located at  $150^{\circ}\text{N}$  and \_\_\_\_ W in the Pacific Ocean.

$120^{\circ}$

$0^{\circ}$
