

# Machu Picchu Math

James and his family take a trip to Peru to explore Machu Picchu. How much of Machu Picchu does James explore each day?

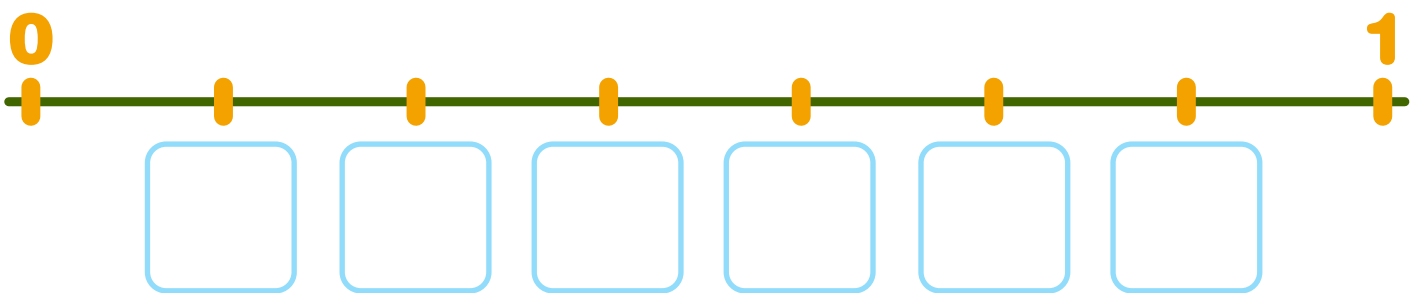

Check the correct point on the number lines to represent each fraction.

**On the first day,** he has a late start but explores  $\frac{5}{10}$  of Machu Picchu.

**On the second day,** he gets up early and hikes all day. He has now explored  $\frac{5}{7}$  of Machu Picchu.

**On the third day,** he wants to make sure he sees as much as possible. He has now explored  $\frac{5}{5}$  of Machu Picchu!
