

# Sequential ORDER

1. Many scientific texts include steps in a **sequential order**, like a procedure for an experiment. Read the following steps.

step 1

Place one paper clip on top of a paper plate.

step 2

Place a strong magnet under the paper plate.

step 3

Move the magnet from side to side.

step 4

?

step 5

Add a second paper plate.

step 6

Repeat steps 3-4.

2. Check the correct statement that could fit in **step 4**.

Record your observations.

Write your hypothesis.
