

An Eagle's Food Chain

Read the information.

1. The Sun helps plants grow.
2. The plants can then produce, or make, their own food.
3. A small mouse eats the plants.
4. A larger animal, the snake, eats the mouse.
5. The largest animal is an eagle and it eats the snake.

Circle **True** or **False**.

Large animals are the most important part of a food chain.

True

False
