

# More About Dinosaurs

Read about triceratops. Then, answer the question below by circling the correct answer.

## Triceratops

Triceratops had a beak, teeth, and three horns. This dinosaur had up to 800 teeth for eating plants. Triceratops walked slowly because they were huge. They could grow up to 26 feet long.

The large bones around its head were called a **frill**.

## What is a frill?

teeth

bones

horns
