

Patterns in Temperature

Meteorologist look at patterns in the weather in order to make predictions. One thing that they do is find patterns in temperature. Look at the temperatures and find the average for the week. Check the correct answer.

Finding an average: add each number, then divide by the total number of addends — in this case you will have 7 addends.

76
degrees

79
degrees

77
degrees

Which seasons could it be based on what you know about seasons and temperature? Check **all that could apply**:

☐

Winter

☐

Summer

☐

Fall

Worksheet Answer Key.

Scan the QR code to get the answer key for this worksheet. In it, you'll also find an explanation of how to solve the worksheet and additional learning resources.

Complete this worksheet online.

Scan the QR code below to open this interactive worksheet!

Let your child learn and play! The worksheet comes with a professional voice over of the task, and will be automatically checked and scored upon completion. Your child will also get suggestions of similar activities.

You can open this online worksheet in any browser and on any device. NO registration or app installation is needed to start learning. Just scan the QR code and there you are!
