

Planets: **MARS**

Read the facts below.

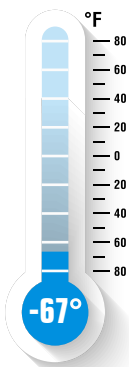

Answer the questions about Mars.

Check the correct boxes.

Mars is the **fourth** planet from the Sun. It is two times smaller than the Earth, and it has **two moons**. The surface of Mars is covered with **red iron dust**, that's why we call it the Red Planet. It's always **very cold** on Mars, because the thin atmosphere of the planet cannot hold heat. The poles of Mars are covered with huge caps of frozen water. Mars has a lot of dead volcanoes. It's home to the largest mountain in the Solar System.

1. Mars is a very _____ planet.
