

SORT AND COUNT TO THE MOON!

Trace on the dotted lines to sort the objects into the correct group. Then count how many objects are in each group.

The diagram shows three sorting bins: 'ROCKETS' on the left, 'PLANETS' on the right, and 'STARS' at the bottom. A central column of objects (a green rocket, two red planets, and a blue star) is connected to the bins by dotted lines. Below this, a larger set of objects (two green rockets, one blue star, one red planet, and one blue star) is also connected to the bins by dotted lines.
