

# The Water Cycle

Look at the picture and read the description of each part of the water cycle. Then, circle the correct numbers to match the descriptions to the picture.

**Evaporation.** The warmth of the sun turns the ocean water into vapor and makes it go up into the air.

1      2      3      4

**Precipitation.** Clouds get full and heavy and the water falls back to the earth in form of snow, rain, sleet or fog.

1      2      3      4

**Collection.** The water is collected in rivers, lakes, oceans or ends up on land.

1      2      3      4

**Condensation.** The water vapor in the air gets cool and turns back into liquid forming clouds.

1      2      3      4

**The Water Cycle**

Look at the picture and read the description of each part of the water cycle. Then, circle the correct numbers to match the descriptions to the picture.

<b>Evaporation.</b> The warmth of the sun turns the ocean water into vapor and makes it go up into the air.	1	2	3	4
<b>Precipitation.</b> Clouds get full and heavy and the water falls back to the earth in form of snow, rain, sleet or fog.	1	2	3	4
<b>Collection.</b> The water is collected in rivers, lakes, oceans or ends up on land.	1	2	3	4
<b>Condensation.</b> The water vapor in the air gets cool and turns back into liquid forming clouds.	1	2	3	4
