

The Water Cycle

Look at the picture and read the description of each part of the water cycle. Then, circle the correct numbers to match the descriptions to the picture.

Evaporation. The warmth of the sun turns the ocean water into vapor and makes it go up into the air.

1 2 3 4

Precipitation. Clouds get full and heavy and the water falls back to the earth in form of snow, rain, sleet or fog.

1 2 3 4

Collection. The water is collected in rivers, lakes, oceans or ends up on land.

1 2 3 4

Condensation. The water vapor in the air gets cool and turns back into liquid forming clouds.
